Notice: Many systems are in stock, but some may have limited quantities available. Most items can be ordered if needed.

Avaya Phone Systems

IP Office at a glance

What is IP Office?

IP Office combines the reliability and simplicity of a traditional phone system with the advantages and functionality of IP telephony. This could help you reduce costs, increase productivity, and improve your customer service.

Who is IP Office for?

Designed for businesses with up to 300 employees. It's ideal for anyone looking to improve customer service, call handling and reducing their costs.

Benefits of IP Office

Easier for customers to contact you

Give your employees a single phone number and a single voice mailbox. Customers only need to call one number to reach your mobile, desk or even home phones. And staff can save time with all their messages in one place.

Get your costs under control

With most applications included as standard, there's no need for additional investment in hardware. You can also reduce travel costs with inclusive conferencing for up to 64 participants.

Flexible and scalable to your business needs

IP Office is a single, stackable, scalable business communications system that grows with your business easily and cost-effectively. Built from the ground up specifically for small and midsize businesses, IP Office provides telephony, messaging, conferencing, customer management and unified communications for business with up to 300 employees.

Streamline your business process

Work smarter: Employees can work together as a productive, effective team - even when they're not in the office, with IP Office.

Security Cameras

We can install and service both CCTV and IP camera systems.

Benefits:

- Remote View
- Deter Crime
- Monitor Activity

CGB TECH News

Back Row:

Pat McGuiness
Willem Ekels
Dave Almendinger

Tim Rood

Jennifer Brunkow
Kevin Knapp

Chris Brunkow

Paul Azzarello

Front Row:

Jeremy Moen

Tujuana Davidson

Steven Skunta

Our technicians are the heart of our Mission; to "Take care of the technology, so you can focus on what you're great at." As we have grown over the past year, we have added techs and given others more responsibility. If you have called in recently, you have probably spoken with Dave Almendinger, who is our scheduler and office manager. Paul Azzarello has transitioned to Bench Manager, working with Willem Ekels, and Stephen Skunta has taken on the challenge of Projects Manager. Tujuana Davidson and Tim Rood have joined Kevin Knapp, Paul and Stephen in the field, training our two summer interns, Pat McGuiness and Noam Gelles. As always, Jeremy, Chris and Jen are available to answer questions anytime.

Refurbished Line

Sometimes a new machine is the answer and sometimes it's not. Previously used and refurbished systems can describe several different conditions. Unlike other vendors, outdated, slow, and dusty machines are not part of our refurbished line. In fact some of these machines are less than a year old. This line offers another option for upgrading hardware on a budget. All systems are fully tested and come with a hardware warranty.

Dell Certified Rebuilt—Direct from Dell, these machines had a part fail under warranty and were repaired by a Dell technician. After thoroughly testing the whole machine it is given a new warranty and redeployed. Some of these systems are only a few months old.

Off-Lease—These are high end machines that companies leased directly from Dell in large quantities. At the end of the contract they are returned to Dell for testing and recertification. This is a great way to get more power and features for less money.

CGB Tech Refreshed— Machines that are repaired and tested on our own Tech Bench. Highly customizable and very affordable. A great choice when repairing is no longer cost-effective.
